Mira Solenne

Houston, TX | 713-555-0142 | mira.solenne@example.com | github.com/mira-solenne-labs

Professional Summary

AI engineer with expertise in RAG, AWS, and MLOps, delivering scalable AI solutions for enterprise risk management.

Education

Gulf Prairie Institute of Technology Houston, TX
M.S. in Applied Data Science, GPA 3.82/4.00 *December 2023*

Redwood Plains University San Marcos, TX
B.S. in Computer Science *May 2021*

Experience

Machine Learning Engineer August 2023 – Present
Northstar Lantern Analytics *Houston, TX*

- Built Python and scikit-learn risk models over SQL data pipelines, raising validated recall by 14% while holding the false-positive rate constant.
- Delivered a retrieval-augmented knowledge API with FastAPI, embeddings, and vector search, reducing median analyst lookup time by 36% in a controlled pilot.
- Containerized models on AWS with MLflow, pytest, and drift alerts, cutting failed monthly releases from five to two in six months.

Data Science Intern June 2022 – August 2022
Copper Finch Systems *Austin, TX*

- Prepared pandas and NumPy sensor features and trained a PyTorch anomaly model that improved F1 by 9% over the baseline.
- Created SQL quality checks and Git-based test fixtures, reducing recurring validation defects by 28% across four reporting runs.

Projects

GridPulse Load Forecaster 2025
Python, pandas, NumPy, scikit-learn, MLflow *Energy*

- Compared reproducible forecasting baselines and improved mean absolute error by 12% over a seasonal-naive baseline across four windows.

ShelfSense Demand Forecaster 2024
Python, SQL, scikit-learn, pandas, MLflow *Retail and Supply Chain*

- Created a weekly forecasting pipeline that reduced holdout MAPE from 24.8% to 18.6% on synthetic store and product histories.

ModelWatch Release Guard 2025
Python, Bash, AWS, Docker, MLflow, pytest, CI/CD *MLOps*

- Detected all eight seeded regressions and reduced repeatable manual release checks from 42 to 15 minutes.

Skills

- **Languages:** Python, SQL, Bash
- **ML, Data & GenAI:** scikit-learn, PyTorch, pandas, NumPy, NLP, Transformers, Time Series Forecasting, Computer Vision, Model Evaluation, Retrieval-Augmented Generation, Embeddings, Vector Search, Prompt Engineering
- **Cloud, MLOps & Systems:** AWS, MLOps, Docker, MLflow, Model Monitoring, CI/CD, FastAPI, REST APIs, Git, pytest, PostgreSQL
