Dear Hiring Manager,

I am excited to apply for the AI Engineer — Camden Corporate Office (Remote Position) position at Camden Property Trust. I am especially interested in this opportunity because the company description highlights the following focus: Its corporate technology organization explores AI tools that can improve resident services, property.

My background aligns with the practical responsibilities of this role. Built Python and scikit-learn risk models over SQL data pipelines, raising validated recall by 14% while holding the false-positive rate constant. This experience has equipped me with the skills to design and implement AI systems that align with the goals of improving property operations and resident services.

Relevant skills: Python, REST APIs, RAG, MLOps, vector databases, prompt engineering

I look forward to the opportunity to contribute to Camden Property Trust's innovative initiatives and discuss how my skills can support your goals.

Sincerely,

Mira Solenne
